

Virtual Interior Design (E-Design)

Our E-Design service offers a streamlined, virtual approach to interior design—perfect for clients who want professional guidance, visual clarity, and flexibility, all from the comfort of their home.

This service is ideal for clients seeking a thoughtfully designed space with a clear plan they can confidently implement on their own.

What Is E-Design?

E-Design is a **virtual interior design service** that provides a complete design concept for your space, including **3D rendered visuals** that allow you to see the design before making any purchases.

Each design is tailored to your style, needs, and budget, delivering a cohesive and elevated look without the need for in-person services.

What's Included

E-Design Investment: \$525 per room/space (even for open floors)

Each E-Design package includes:

- **15-minute phone consultation** to discuss your vision, goals, and design needs
- A **custom design board** outlining the overall style direction and color palette
- **3D rendered visuals** to bring the design to life and provide visual clarity

- A **clickable shopping list** with curated furniture and décor recommendations
- **One revision** to refine the design based on your feedback
- **5–7 business day turnaround** from receipt of all required information

This service provides a complete design roadmap you can follow at your own pace.

Important Service Details

To ensure clarity and alignment, please note the following:

- **Full payment of \$525 per room is required upfront** prior to the start of services
- This is a **design-only service**
- Purchasing, installation, styling, contractor coordination, and on-site services are not included
- Once the designs are **submitted and approved**, the E-Design service is **concluded**
- No additional revisions or services are provided beyond the scope outlined above

This structure allows us to deliver a focused, efficient design experience with clear deliverables.

Ideal For

E-Design is a great fit for:

- Clients outside of our local service area
 - Those who prefer a virtual design experience
 - DIY-friendly clients who want a professional plan
 - Single-room refreshes or phased design projects
-

How to Get Started
